

GASP Pool Vaporisation Model Reports and Papers – May 2020

1. Batt R (2014) “Modelling of liquid hydrogen spills”, HSE Research Report RR985, <https://www.hse.gov.uk/research/rrpdf/rr985.pdf>
2. Webber D M et al (2010) “LNG source term models for hazard analysis”, HSE Research Report RR780, <https://www.hse.gov.uk/research/rrpdf/rr789.pdf>
3. Webber DM (1991) “A model of steady discharge into a vaporising pool”, SRD Report SRD/HSE/R493, Apr 1991
4. Webber D M (1990) “A model for pool spreading and vaporisation and its implementation in the computer code GASP”, SRD Report SRD/HSE/R507, Sept 1990
5. Brighton P W M (1989) “Further verification of a theory for heat and mass transfer from evaporating pools”, SRD Report dated Jan 1989
6. Webber D M (1987) “Heat conduction under a spreading pool”, SRD Report SRD/HSE/R421, Oct 1987
7. Webber D M and Brighton P W M (1987) “An integral model for spreading, vaporising pools”, SRD Report SRD/HSE/R390, Aug 1987
8. Webber D M and Brighton P W M (1986) “Similarity solutions for the spreading of liquid pools”, SRD Report SRD/HSE/R371, Jul 1986
9. Brighton P W M (1985) “Evaporation from a plane liquid surface into a turbulent boundary layer”, J. Fluid Mech., Vol. 159, Oct 1985, pp 323-345, <https://doi.org/10.1017/S0022112085003238>
